

CapiNet™

Individual irrigation for every type of growing system or receptacle in greenhouses and nurseries

Netafim's innovative pressure non-compensated on-line micro dripper guarantees uniform flow - regardless of micro tube length.

- Turbulent flow through wide water passages ensures high clog resistance, utmost reliability, efficiency and uniformity
- CapiNet™ stake ensures stabilization of end dripper so that drops are directed exactly where they are required in the pot
- Dimensions identical to capillary micro tubes, enable easy integration into existing irrigation installations
